

Family Garden Bar Graph

Due Date _____

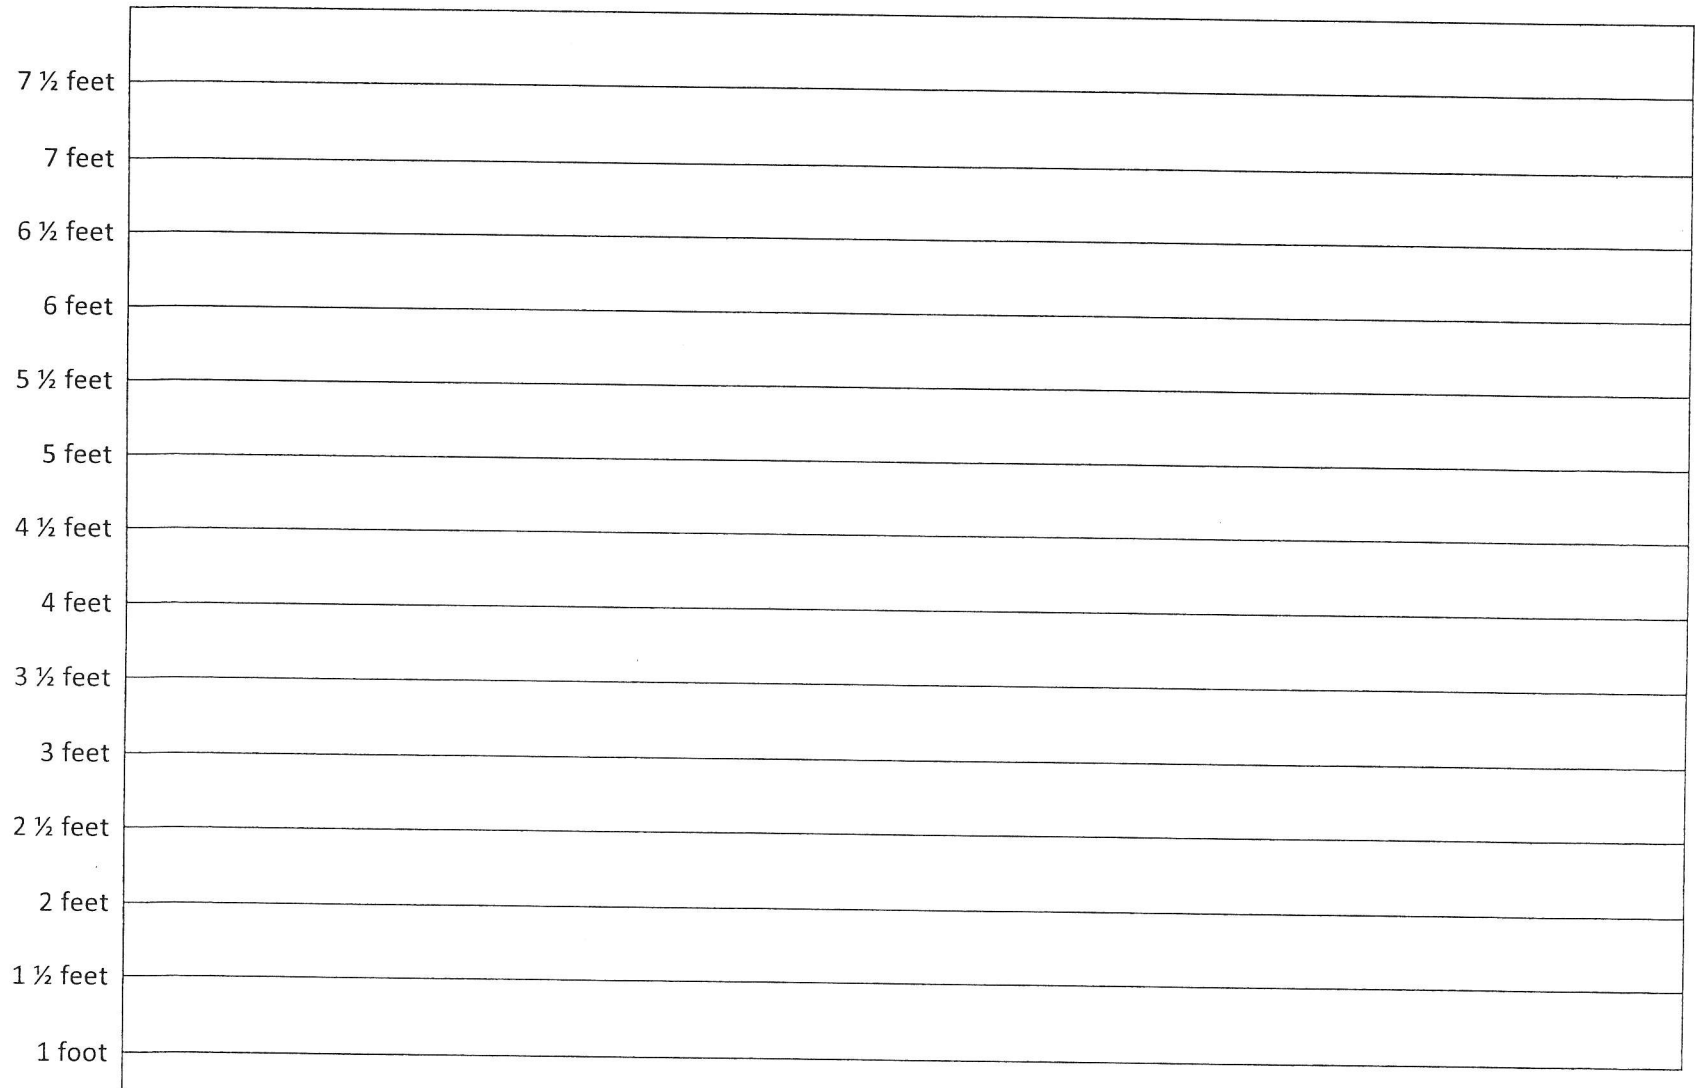

1. Measure the height of each person in your family. You can do this by having each person stand up straight inside a doorway. Lay a book or piece of cardboard on top of their head and against the wall. Use the book or cardboard as a guide to make a tiny pencil mark on the doorway. Then measure from the pencil mark to the floor with a tape measure or measuring stick.
2. You can include pets in your family garden.
3. Draw a flower on the graph above each person's name. The very top of each flower should reach the person's height on the graph. Leave room in the flower for the family member's face.

4. Make each flower personal. Either draw or glue a photograph of your family member's face in their flower.
5. Glue the graph in the center of a sheet of construction paper.
6. Decorate the whole page to look like a garden.
